Esp Memorisation

Task 1

3.30h

Essentially going over the focus of the project and analysing other examples and the brief specifications.

Research points

List of all the topics that will be researched in the document.

Proj spec

Mechanical *(if applicable)*

Explain any mechanical features of the project, use examples of existing infrastructure. Recall the specifications from design brief

Technology

Find any existing tech to use and explain how it could be applied in the project or any that is used in other instances, use examples of existing infrastructure. Recall the specifications from design brief

Materials

Show research on different materials and properties that could be used in the project, think sustainability. use examples of existing infrastructure. Recall the specifications from the design brief. List different materials then argue both for and against.

Budget

All materials and tech used in the project listed out with prices and sources

Summary

Summarise the previous pages into a short 2-3 paragraphs explaining how the researched materials and tech are appropriate “Each component of the project has been evaluated in terms of materials and how each material researched and written on is the ideal candidate for the purpose”

Bibliography

Sight all sources
